

List of accepted papers & member abstracts (sorted by type)

A. Oral presentations of 6-page papers

107	A Quantum Probability Explanation for Violations of Symmetry in Similarity Judgments	Emmanuel Pothos
119	A Memory-Based Account of the Spatial Prisoner's Dilemma	Chenna Reddy Cotla
121	Effects of Semantic Integration and Advance Planning on Grammatical Encoding in Sentence Production	Maureen Gillespie
123	Distributed Cognition and Insight Problem Solving	Frederic Vallee-Tourangeau
128	Fortunate Conjunctions Revived: Feature Binding with the 2f-ST2 Model	Srivas Chennu
129	How children learn to value numbers: Information structure and the acquisition of numerical understanding	Melody Dye
134	Reverse Appraisal: Inferring from Emotion Displays who is the Cooperator and the Competitor in a Social Dilemma	Celso de Melo
136	Is the Centrality of Design History Function an Effect of Causal Knowledge?	Sergio Chaigneau
146	A Comparison of Human and Agent Reinforcement Learning in Partially Observable Domains	Finale Doshi-Velez
165	Design features of language emerge from general-purpose learning mechanisms	Padraic Monaghan
172	Infants Use Social Signals to Learn from Unfamiliar Referential Cues	Rachel Wu
177	Estimating human priors on causal strength	Saiwing Yeung
182	Learning Linear Spatial-Numeric Associations Improves Memory for Numbers	Clarissa Thompson
220	Immunity to error through misidentification and non-attributive self-reference	Ted Loughheed
222	Visual Search as a Combination of Automatic and Attentive Processes	Christopher Donkin
228	Naïve Inference viewed as Computation	Chris Thornton
252	Do words reveal concepts?	Barbara Malt
253	Evidence against a strong association between numerical symbols and the quantities they represent	Ian Lyons
258	A Pseudo-Deterministic Model of Human Language Processing	Jerry Ball
259	A Comparison of Three Measures of the Association Between a Feature and a Concept	Mathew Zeigenfuse
262	The Relevance of a Probabilistic Mindset in Risky Choice	Adrian Camilleri
266	Multimodal Transfer of Repetition Patterns in Artificial Grammar Learning	Sara Finley
268	Finding neural correlates of drift diffusion processes in EEG oscillations	Marieke van Vugt
276	Predictability effects in adult-directed and infant-directed speech: Does the listener matter?	John Pate
282	Estimating the strength of unlabeled information during semi-supervised learning	Brenden Lake
286	Dynamical Emotions: Bodily Dynamics of Affect during Problem Solving	Sidney DMello
293	Semantic Regularities in Grammatical Categories: Learning Grammatical Gender in an Artificial Language	Jelena Mirkovic
312	Building Cognition: The Construction of External Representations for Discovery	Sanjay Chandrasekharan
313	A Causal Model Theory of Judgment	Abigail Sussman
314	The learnability of constructed languages reflects typological patterns	Harry Tily
315	Simulating Event-Related Potential Reading Data in a Neurally Plausible Parallel Distributed Processing Model	Sarah Laszlo

317	A Bayesian model of navigation in squirrels	Anna Waisman
327	A mechanism to increase argument strength with negative evidence	Daniel Heussen
338	Language evolution is shaped by the structure of the world: An iterated learning analysis	Amy Perfors
346	The inception of simulation: a hypothesis for the role of dreams in young children	Serge Thill
347	Associative and Categorical Priming in Recognition of Individuals	Barbara Bazzanella
348	Top-down Planning and Bottom-up Perception in a Problem-solving Task	Enkhbold Nyamsuren
349	Modeling Underlying Mechanisms of the Implicit Association Test	Boon Kiat Quek
351	Concept Learning and Modal Reasoning	Charles Kemp
353	Language Mediated Visual Search: The Role of Display Preview	John Jones
357	Thinking for Seeing: Enculturation of Visual-Referential Expertise as Demonstrated by Photo-Triggered Perceptual Reorganization of Two-Tone “Mooney” Images	Jennifer Yoon
360	Learning by Observing Tutorial Dialogue versus Monologue Collaboratively or Alone	kasia muldner
362	Discovering Inductive Biases in Categorization through Iterated Learning	Kevin Canini
377	Children's comprehension and production of transitive sentences is sensitive to the causal structure of events	Melissa Kline
386	Speaker gaze affects utterance comprehension beyond visual attention shifts	Maria Staudte
404	Distal prosody influences lexical interpretation in online sentence processing	Meredith Brown
407	A Preliminary Report on the Effects of Mild Traumatic Brain Injury on Spatial Attention	Scott Sinnett
408	Agency and Rhythmic Coordination: Are We Naught but Moving Dots?	Charles Coey
413	The emergence of procedural conventions in dialogue	Gregory Mills
427	Gesturing by aphasic speakers, how does it compare?	Lisette Mol
428	Salient in the mind, salient in prosody	Constantijn Kaland
444	Explanation Effects Override Formal Category Definitions In Clinical Experts' Diagnostic Judgments	Nancy Kim
460	Which Parts of Scientific Explanations are Most Important?	Benjamin Rottman
461	Selective attention and speech errors: Feature migration in time	Nazbanou Nozari
464	N-back Training Task Performance: Analysis and Model	J. Isaiah Harbison
465	Memory Representations Supporting Speakers' Choice of Referring Expression: Effects of Category Overlap and Shared Experience	Kristen Gorman
489	Capturing mental state reasoning with influence diagrams	Alan Jern
509	A Nonparametric Bayesian Model of Visual Short-Term Memory	Emin Orhan
521	How Brief Initial Inspection of a Picture May Foster Comprehension of Text	Alexander Eitel
534	Distinguishing Levels of Grounding that Underlie Transfer of Learning	Lisa Byrge
536	Designing learning materials to foster transfer of principles	Lennart Schalk
537	Effects of Aging and Individual Differences on Credibility Judgment of Online Health Information	Qingzi Liao
552	Is Instinct Rational? Are Animals Intelligent? An Abductive Account	Lorenzo Magnani
559	Time-interval statistics adaptively modulate decision makers' willingness to wait for delayed outcomes	Joseph McGuire
580	Number Preference, Precision and Implicit Confidence	Matthew Welsh

581	Comparisons in Category Learning: How Best to Compare For What	Erin Jones
586	An Ideal Observer Model of Visual Short-Term Memory Predicts Human Capacity-Precision Tradeoffs	Chris Sims
591	Categorial compositionality continued: A category theory explanation for quasi-systematicity	Steven Phillips
600	Coexistence of Multiple Modal Dominances	Marvin Chandra
603	Don't Stop 'Til You Get Enough: Adaptive Information Sampling in a Visuomotor Estimation Task	Mordechai Juni
610	Is Evoking Negative Meanings the Unique Feature of Adjective Metaphors? :Through the Comparison with Nominal Metaphors and Predicative Metaphors	Maki Sakamoto
631	Attribute preference and priming in reference production: Experimental evidence and computational modeling	Albert Gatt
635	The Nature of Mental Images - An Integrative Computational Theory	Jan Frederik Sima
639	Rational Order Effects in Responsibility Attributions	Tobias Gerstenberg
640	Brief Familiarization Primes Covert Imitation in 9-month-old Infants	Bennett Bertenthal
645	Effects of information comprehensibility and argument type on lay recipients' readiness to defer to experts when deciding about scientific knowledge claims	Lisa Scharrer
648	Bilinguals activate words from both languages when listening to spoken sentences: Evidence from an ERP-study	Nivedita Mani
650	Prepositions in and on retain aspects of spatial meaning in abstract contexts	Anja Jamrozik
653	Interactive Coin Addition: How Hands Can Help Us Think	Hansjoerg Neth
656	The Thickness of Musical Pitch: Psychophysical evidence for the Whorfian hypothesis	Sarah Dolscheid
661	How Reading Goals and Rhetorical Signals Influence Recipients' Recognition of Intertextual Conflicts	Marc Stadler
664	When do we integrate spatial information acquired by walking through environmental spaces?	Agnes Henson
673	Measuring Learning Progress via Self-Explanations versus Problem Solving - A Suggestion for Optimizing Adaptation in Intelligent Tutoring Systems	Christine Otieno
678	Acquiring Word Learning Biases	Zi Lin Sim
684	Does Teaching Experience Help? Differences in the Assessment of Tutees' Understanding Between Teacher Tutors and Student Tutors	Stephanie Herppich
692	Optimal Models of Human Multiple-Target Visual Search	Matthew Cain
698	The computational costs of recipient design and intention recognition in communication	Mark Blokpoel
702	A Model-Based Approach to Measuring Expertise in Ranking Tasks	Michael Lee
729	Racing for the City: The Recognition Heuristic and Compensatory Alternatives	Katja Mehlhorn
732	Templatic features for modeling phoneme acquisition	Emmanuel Dupoux
733	Conscious Intentions	Anthony Dardis
735	An Embodied Developmental Robotic Model of Interactions between Numbers and Space	Marek Rucinski
737	The Attraction of Visual Attention to Texts in Real-World Scenes	Hsueh-Cheng Wang
741	Navigation strategy as a predictor of navigation performance	Matthew Rodgers
750	Ghosts of Theories Past: The Ever-Present Influence of Long-Discarded Theories	Andrew Shtulman
756	Reasoning with Conjunctive Causes	Bob Rehder
757	Multisensory Associative-Pair Learning: Evidence for 'Unitization' as a specialized mechanism	Elan Barenholtz

758	Why Radicals Win the Newsday?: Ratcheting-up of Cultural Counterintuitiveness in Rumors and NRM Doctrine	M. Afzal Upal
759	Motivation and Motor Control: Hemispheric Specialization for Motivation Reverses with Handedness	Geoffrey Brookshire
763	Modeling Category Identification Using Sparse Instance Representation	Michael Lee
764	The Role of Comparison in Mathematics Learning	Shanta Hattikudur
766	Strategic Resources Support the Interpretation of Doubly-Quantified Sentences	Corey McMillan
767	Construction in Semantic Memory: Generating Perceptual Representations With Global Lexical Similarity	Brendan Johns
768	Motivational Influences on Attentional Scope	Ruby Nadler
773	What Makes an Explanation Believable?: Mechanistic and Anthropomorphic Explanations of Natural Phenomena	Jim Davies
775	Storage and computation in syntax: Evidence from relative clause priming	Melissa Troyer
782	Perceptual Fluency Affects Categorization Decisions	Sarah Miles
783	'Look No Goals!': A Sufficient Model of Simple Algebra Problem Solving Without Explicit Goal Representation	Gareth Miles
790	A Cue Imputation Bayesian Model of Information Aggregation	Jennifer Trueblood
798	A computational theory of human perceptual mapping	Wai Yeap
806	Markers of Discourse Structure in Child-Directed Speech	Hannah Rohde
807	Incremental Models of Natural Language Category Acquisition	Trevor Fountain
810	A Text Corpus Analysis Approach to the Conjunction Fallacy	Wajima Yuichiro
813	Quantifying the diversity of neural activations in individual brain regions	Michael Anderson
815	Implicit learning of phonotactic constraints: Transfer from perception to production	Audrey Kittredge
822	Learning to perceive time: A connectionist, memory-decay model of the development of interval timing in infants	Caspar Addyman
829	An Investigation of Accuracy of Metacognitive Judgments during Learning with an Intelligent Multi-Agent Hypermedia Environment	Reza Feyzi Behnagh
835	Contrast in natural language concepts: An exemplar-based approach	Wouter Voorspoels
846	Explaining drives the discovery of real and illusory patterns	Joseph Jay Williams
852	Learning near-optimal search in a minimal explore/exploit task	Ke Sang
853	Criterion Setting and the Dynamics of Recognition Memory	Gregory Cox
863	Individual differences in visual comprehension of morphological complexity	Victor Kuperman
867	Distributional and Temporal Properties of Eye Movement Trajectories in Scene Perception	Theo Rhodes
875	Mammoth Cloning Reminds Us of "Jurassic Park" but Storm Replication Does Not: Naturalistic Settings Do Not Aid the Retrieval of Distant Analogs	Maximo Trench
877	Cultural emergence of combinatorial structure in an artificial whistled language	Tessa Verhoef
883	Rethinking the role of error in attentional learning	Mark Blair
884	Local statistical learning under cross-situational uncertainty	Luca Onnis
885	A Simple Sequential Algorithm for Approximating Bayesian Inference	Elizabeth Baraff Bonawitz
891	Visual Motion Perception using Critical Branching Neural Computation	Janelle Szary
902	Investigating the effects of prestige on the diffusion of linguistic variants	Monica Tamariz
922	The Influence of Writing Experiences on Holistic Processing in Chinese Character Recognition	Ricky Van Yip Tso

923	Spatial Reasoning within Visible Functional Constraints	Georg Jahn
952	Gesture During Mental Rotation	Autumn Hostetter
985	I Do Know What You Think I Think: Second-Order Theory Of Mind In Strategic Games Is Not That Difficult	Ben Meijering
993	Sex Differences in Brain Activation During Virtual Navigation: A Functional MRI Study	Nicole Nowak
999	Computational exploration of the relationship between holistic processing and right hemisphere lateralization in featural and configural recognition tasks	Janet Hsiao
1001	In the Eyes of the Beholder: What Eye-Tracking Reveals About Analogy-Making Strategies in Children and Adults	Jean-Pierre Thibaut
1004	Examining the Role of Object Size in Judgments of Lateral Separation	Guy Lacroix
1005	Does retrieval require effort? Effects of memory strength on pupil dilation.	Hedderik van Rijn
1006	Now I like it, now I don't: Delay effects and retrospective judgment	Silvio Aldrovandi
1017	Searching for cultural influences on the body-specific association of preferred hand and emotional valence	Julio Santiago
1024	Reward Prediction Error Signals are Metarepresentational	Nicholas Shea
1026	Priming Spatial Perspective	Elena Andonova
1054	Learning Simple Statistics for Language Comprehension and Production: The CAPPUCCINO Model	Stewart McCauley
1056	A Computational Model of Complex Skill Learning in Varied-Priority Training	Wai-Tat Fu
1060	Exploring the Assistance Dilemma: The Case of Context Personalization	Candace Walkington
1062	Functional Biases in Language Learning: Evidence from Word Order and Case-Marking Interaction	Maryia Fedzechkina
1067	Visualizing thought: Mapping category and continuum	James Corter
1075	Do you have to look where you go? Gaze behaviour during spatial decision making	Jan Wiener
1076	Critical Branching Neural Computation, Neural Avalanches, and 1/f Scaling	Christopher Kello
1077	Identifying causal pathways with and without diagrams	James Corter
1091	Wayfinding and description strategies in an unfamiliar complex building	Thora Tenbrink
1094	Semantic structure in improvised communication	Marieke Schouwstra
1095	Effects of speaker gaze on spoken language comprehension: task matters	Helene Kreysa
1100	Modeling the Logarithmic-To-Linear Shift In Representations Of Numerical Magnitudes	Leif K. Lende
1106	Explaining Categorization Response Times with Varying Abstraction	Loes Stukken
1109	The Effect of Labels on Categorization: Is Attention to Relevant Features a Good Index of Infants' Category Learning?	Catherine Best
1119	Gaze Following as Goal Inference: A Bayesian Model	Abram Friesen
1123	Episodic grammar: a computational model of the interaction between episodic and semantic memory in language processing	Gideon Borensztajn
1142	Pretesting with Multiple-choice Questions Facilitates Learning	Jeri Little
1143	When More Evidence Makes Word Learning Less Suspicious	Gavin Jenkins
1145	Preparing Students for Effective Explaining of Worked Examples in the Genetics Cognitive Tutor	Albert Corbett
1154	Using Manual Rotation and Gesture to Improve Mental Rotation in Preschoolers	Raedy Ping
1168	Toddlers' understanding of prediction, intervention, and means of transmission: When psychological outcomes are easier than physical ones	Paul Muentener

1174	Early Talkers and Late Talkers Know Nouns that License Different Word Learning Biases	Eliana Colunga
1175	Effects of Filler-gap Dependencies Working Memory Requirements for Parsing	Willam Schuler
1180	Word Learning through Sensorimotor Child-Parent Interaction: A Feature Selection Approach	Chen Yu
1181	Slow to anger: Emergence of emotionally loaded words and faces from interocular suppression	David Vinson
1182	Beyond probability gain: Information access strategies in category learning	Mark Blair
1185	Estimating scene typicality from human ratings and image features	Krista Ehinger
1190	Zipfian word frequencies support statistical word segmentation	Chigusa Kurumada
1199	A Tale of Two Processes: Categorization Accuracy and Attentional Learning Dissociate with Imperfect Feedback	Mark Blair
1206	Outcomes and Mechanisms of Transfer in Invention Activities	Ido Roll
1212	Beyond the retina: Evidence for a face inversion effect in the environmental frame of reference	Nicolas Davidenko
1215	Let's Go for a Run: Planning Routes to Remember	Holly Taylor
1218	Does Space Structure Spatial Language? Linguistic Encoding of Space in Sign Languages	Pamela Perniss
1223	The Relation between Finger Gnosis and Mathematical Ability: Can we Attribute Function to Cortical Structure with Cross-Domain Modeling?	Marcie Penner-Wilger
1226	Chomsky and embodied cognition: A sensorimotor interpretation of Minimalist logical form	Alistair Knott
1231	Phonological generalization from distributional evidence	Bozena Pajak
1238	The Distribution of Repair in Dialogue	Patrick Healey
1240	Simulating Realism in Language Comprehension	Kevin Holmes
1250	Progressive Alignment Facilitates Learning of Deterministic But Not Probabilistic Relational Categories.	Wookyoung Jung
1251	The Schematic Representation of Spatial Relations: Evidence from Group and Single-Case Lesion Studies	Alexander Kranjec
1253	Cloze but no cigar: The complex relationship between cloze, corpus, and subjective probabilities in language processing	Nathaniel Smith
1258	Simplicity Effects in the Experience of Near-Miss	Jean-Louis Dessalles
1259	A Comparison of Nepalese and American Children's Concepts of Free Will	Nadia Chernyak
1264	Multisensory Sensemaking: Children's Exploratory Behavior has Organizing Structure at Micro- and Macro-scales	Nancy Owens Renner
1274	Interactive rhythmic auditory stimulation system reinstates natural 1/f timing in gait of Parkinson's patients	Michael Hove
1275	Blocking Requires Uncertainty about Novel Cues	Pei-Pei Liu Pei-Pei
1276	Modeling Multitrial Free Recall with Unknown Rehearsal Times	James Pooley
1277	Improving Adaptive Learning Technology through the Use of Response Times	Everett Mettler
1281	The Rational Hypocrite: Informal Argumentation and Moral Hypocrisy	Tage Rai
1286	Finding the Cause: Examining the Role of Qualitative Causal Inference through Categorical Judgments	Michael Pacer
1287	The emergence of probabilistic reasoning in very young infants	Stephanie Denison
1296	Transfer, and the Effects of Context Outside of the Training Task	Samuel Day
1299	The evolution of irrational decision-making: insights from non-human primates	Venkat Lakshminarayanan
1314	Productivity and Reuse in Language	Timothy O'Donnell
1316	Use of Complementary Actions Decreases with Expertise	John Lindstedt
1323	Allocation of Attention in Classroom Environments: Consequences for Learning	Karrie Godwin

1329	The Influence of Learner Characteristics on Conducting Scientific Inquiry Within Microworlds	Janice Gobert
1336	Linear Numerical Magnitude Representations Aid Memory for Single Numbers	John Opfer
1341	Neurophysiological Correlates of Visual Statistical Learning in Adults and Children	Christopher Conway
1344	Classroom-based Experiments in Productive Failure	Manu Kapur
1350	Graded structure in adjective categories	Simon De Deyne
1354	Unlocking potential: Individual differences in the use of concurrent scientific visualizations	Scott Hinze
1357	Humans use different statistics for sequence analysis depending on the task	Daniel Navarro
1359	Modeling Abstract Numeric Relations Using Concrete Notations	David Landy
1363	An Artificial Grammar Investigation into the Mental Encoding of Syntactic Structure	Whitney Tabor
1374	Learning to Balance a Beam: The Effect of Instability	David Pfeiffer
1375	When Hearing Lips and Seeing Voices Becomes Perceiving Speech: Auditory-Visual Integration in Lexical Access	Rachel Ostrand
1391	Partial Representations of Scenes in Change Blindness: In the Eyes and in the Hands	Nick Benesh
1393	Effects of Using Mental and Manual Rotation Training on Mental and Manual Rotation Performance	Deanne Adams
1402	Towards a Law of Human Conceptual Behavior	Ronaldo Vigo
1403	The Wisdom of Crowds with Communication	Brent Miller
1407	Modeling Acute and Compensated Language Disturbance in Schizophrenia	Uli Grasemann
1416	To catch a liar: The effects of truthful and deceptive testimony on inferential learning	Robert Montague
1417	Using Inverse Planning and Theory of Mind for Social Goal Inference	Sean Tauber
1420	The Effects of Peer Communication with Diagrams on Students' Math Word Problem Solving Processes and Outcomes	Yuri Uesaka
1425	Reasoning in teaching and misleading situations	Russell Warner
1430	Forgetting Curves Emerge from Dynamics of Integrated Memory	Eva Cadez
1432	A value-relativistic decision theory predicts known biases in human preferences	Nisheeth Srivastava
1434	A Network Analysis Approach to Understand Human-wayfinding Problem	Sudarshan Iyengar
1442	Basic Information Processing Effects from Perceptual Learning in Complex, Real-World Domains	Khanh-Phuong Thai
1446	Theory of Mind for you, and for me: behavioral and neural similarities and differences in thinking about beliefs of the self and other.	Hyowon Gweon
1450	Uncertainty and dependency in causal inference	Christopher Carroll
1451	Bayesian Theory of Mind: Modeling Joint Belief-Desire Attribution	Chris Baker
1453	Apparent Paradoxes in Moral Reasoning; Or how you forced him to do it, even though he wasn't forced to do it.	Jonathan Phillips
1456	Probabilistic internal physics models guide judgments about object dynamics	Jessica Hamrick
1460	A neuroplausible computational model of vision also exhibits asymmetry in developmental category learning	Ankit Gupta
1464	The Role of Cross-cutting Systems of Categories in Category-based Induction	Neil Smith
1470	One shot learning of simple visual concepts	Brenden Lake
1477	Temporal Shifts in Perceived Similarity Affect Consumer Valuation and Choice	Oleg Urminsky

B. Poster presentations of 6-page papers

104	Effects of Grounded and Formal Representations on Combinatorics Learning	David Braithwaite
106	Spatial Registry Model : Towards a Grounded Account for Executive Attention	Nader Noori
115	Spatial Thinking in Physics: Longitudinal Impacts of 3-D Spatial Training	David Miller
118	Influence of Implicit Beliefs and Visual Working Memory on Label Use	Amanda Hahn
138	Detecting deviations from randomness	Jiaying Zhao
141	Credibility of Stories about Design History	Sergio Chaigneau
159	A Study of the Pragmatic Prototypical Categories of Rhetorical Questions	Hongbo Chen
171	Canonical views of scenes depend on the shape of the space	Krista Ehinger
184	Cognitive Modeling of Event-Related Potentials	Gordon Griffiths
186	Creative Choices in Choreography: A New Qualitative Methodology	Dafne Muntanyola
197	Gender, Spatial Ability, and High-Stakes Testing	Teomara Rutherford
199	Adults Are Sensitive to Variance When Making Likelihood Judgments	Dana Chesney
202	Processing Scalar Inferences in Face-Threatening Contexts	Jean-Francois Bonnefon
203	Towards a Categorization-Based Model of Similarity	Steven Verheyen
214	Simulating a route with your index finger: Effect of mental rehearsal on spatial memory	Wing Chee So
223	Funding Opportunities for Cognitive Scientists through the Institute of Education Sciences	Amy Sussman
226	Is there any Need to Mention Induction?	Chris Thornton
229	Simulating the Temporal Dynamics of Learning-Related Shifts in Generalization Gradients with a Single-Layer Perceptron	Eduardo Mercado
232	Integrating the Horizontal and Vertical Cultural Transmission of Novel Communication Systems	Carrie Theisen-White
243	Controlling Stable and Unstable Dynamic Decision Making Environments	Magda Osman
247	Factors Related to Passage Length: Implications for Second Language Listening Comprehension	Amber Bloomfield
249	How Far Can Indirect Evidence Take Us? Anaphoric One Revisited	Lisa Pearl
265	Generalization to Novel Consonants in Artificial Grammar Learning	Sara Finley
271	Tracing the Process of Rating Decisions through Cursor Movements	kenpei shiina
280	Metacognitive Judgments, Study-Time Allocation and Inferences: The Effect of Multimedia Discrepancies	Candice Burkett
281	The Whole Number Bias in Fraction Magnitude Comparisons with Adults	Melissa DeWolf
283	Creative Interference and States of Potentiality in Analogy Problem Solving	Liane Gabora
294	The Ellsberg ‘Problem’ and Implicit Assumptions under Ambiguity	Sule Guney
308	What makes intensional estimates of probabilities inconsistent?	Sangeet Khemlani
318	Children's Use of Structure Mapping in Numerical Estimation	Jessica Sullivan
319	Individual Performance in Optimal Bayesian Inference	Rakesh Patel
326	Layers of Joint Commitments in Interpersonal Communication	Marco Colombetti
328	Asymmetry in Stroop interference arising from naming practice: shape beats color	Athanassios Protopapas
335	Dual Character Concepts	Joshua Knobe
336	Processing Emergent Features in Metaphor Comprehension	Asuka Terai
352	Perceptual and Conceptual Cues in Classification and Inference Tasks	Clare Sims

361	Memory limitations alone do not lead to over-regularization: An experimental and computational investigation	Amy Perfors
364	An Inhibited Recognition Performance for Explicitly Presented Target-Aligned Irrelevant Stimuli in the Auditory Modality	Andrew Dewald
367	The formation of context in artificial object recognition	Anthony Knittel
374	Philosophers, three year olds & autistics	Peter Slezak
379	Robust Language Acquisition – an Emergent Consequence of Language as a Complex Adaptive System	Nick Ellis
382	Spatial biases in understanding descriptions of static scenes: The role of reading and writing direction	Julio Santiago
388	Learning Causal Direction from Repeated Observations over Time	Benjamin Rottman
389	Why readers regress to previous words: A statistical analysis	Klinton Bicknell
390	Informativity versus logic: Children and adults take different approaches to word learning	Melody Dye
394	On the Emergence of Analogical Inference	Paul Thibodeau
396	Do children and adults learn forward and inverse conditional probabilities together?	Charles Kalish
400	The Sensory-Dependent Nature of Audio-Visual Interactions for Semantic Knowledge	Guillaume Vallet
403	A Corpus Analysis of Strategy Video Game Play in Starcraft: Brood War	Joshua Lewis
411	Adaptive Magnitude and Valence Biases in a Dynamic Memory Task	George Kachergis
415	Retrieval Dynamics of In-the-Moment and Long-Term Statistical Word Learning	Haley Vlach
418	Scaling up from Micro Cognition to Macro Cognition: Using SGOMS to build Macro Cognitive Models of Sociotechnical Work in ACT-R	Robert West
420	The Repetition-Break Plot Structure: A Tool for Persuasion	Jeffrey Loewenstein
426	A cognitive computational model of eye movements investigating visual strategies on textual material	Benoit Lemaire
432	GREEBLES Greeble greeb. On reduction in speech and gesture in repeated references.	Marieke Hoetjes
440	Simultaneous Online Tracking of Adjacent and Non-adjacent Dependencies in Statistical Learning	Loan Vuong
442	The effect of time pressure and the spatial integration of the stimulus dimensions on overall similarity categorization.	Fraser Milton
447	Can Sleep Enhance both Implicit and Explicit Processes?	Andrea Smyth
450	The Influence of Conceptual Structure on Structural Priming	Ann Bungler
451	Investigating how infants learn to search in the A-not-B task	Melody Dye
452	For the price of a song: How pitch category learning comes at a cost to absolute frequency representations	Melody Dye
462	A Model of Concept Generalization and Feature Representation in Hierarchies	Timothy Rubin
466	A Computational Model of Auditory Perceptual Learning: Predicting Learning Interference Across Multiple Tasks	David Little
467	When does provision of instruction promote learning?	Hee Seung Lee
468	A Multimodal Investigation of Recognition Performance for Target-Aligned but Irrelevant Stimuli	Andrew Dewald
469	Modeling Decision Making on the Use of Automation	Junya Morita
470	Comics on the Brain: Structure and Meaning in Sequential Image Comprehension	Neil Cohn
473	Does Attention Confer Importance? Examining Evidence from the Multiattribute Choice Domain	Anirudh Tiwathia
474	The Virtues and Vices of Biased Rationality: An Eco-Cognitive Account	Emanuele BARDONE
475	The contribution of cognitive style, cognitive abilities and expertise to the solving of complex problems	Aline Sevenants

476	Everyday navigation in real and virtual environments informed by semantic knowledge	Gerhard Strube
481	Perception of intentions and mental states in autonomous virtual agents	Peter Pantelis
485	Effects of scene variation on referential overspecification	Ruud Koolen
486	Don't Look Now: The relationship between mutual gaze, task performance and staring in Second Life	Sara Dalzel-Job
491	Using a Cognitive Model to Provide Instruction for a Dynamic Task	Jungaa Moon Moon
500	A one-stage distributed processing account of linguistic negation	Stephanie Huette
501	Joint Action Theory and Pair Analytics: In-vivo Studies of Cognition and Social Interaction in Collaborative Visual Analytics	Richard Arias-Hernandez
511	Exploring Moral Reasoning in a Cognitive Architecture	Wayne Iba
514	The topic comprehension process in simile sentences	Tomohiro Taira
515	Cognitive Bubbles and Firewalls: Epistemic Immunizations in Human Reasoning	Lorenzo Magnani
518	The Development of Context Use and Three Way Bindings in Episodic Memory	Hyungwook Yim
519	Cost of Attention as an Indicator of Category Learning	Hyungwook Yim
523	A Tale of Two Semantic Systems: Taxonomic and Thematic Knowledge	Daniel Mirman
524	Is Arithmetic Embodied? Differential Interference of Sequential Finger Tapping on Addition during a Dual Task Paradigm	Firat Soylu
546	Truth Table Tasks: Directionality and Negation-Type	Aline Sevenants
554	Hypothetical Cognition and Coalition Enforcement. Language, Morality, and Violence	Lorenzo Magnani
569	Children posit hidden causes to explain causal variability	David Buchanan
572	How Long Have I Got? Making Optimal Visit Durations in a Dual-Task Setting	George Farmer
574	Classifying patients and controls using multi-dimensional scaling and exploring the metric of semantic space	Steven Chance
577	Framing influences aggregate judgments of learning	Corinne Townsend
578	Horizontal Trumps Vertical in the Spatial Organization of Numerical Magnitude	Kevin Holmes
589	What Varying the Learning Task and Category Structure Reveals About Inference Learning	Seth Chin-Parker
594	Inducing homonymy effects via stimulus quality and (not) nonword difficulty: Implications for models of semantic ambiguity and word recognition	Blair Armstrong
597	Going with the group in a competitive game of iterated reasoning	Seth Frey
599	Cross-Language Priming in Chinese-English Bilinguals with Different Second Language Proficiency Levels	Xiaowei Zhao
604	Individual differences in anchoring: numerical ability, education and experience	Matthew Welsh
605	Semantic, Aesthetic, and Cognitive Effects of Flashbacks in Film	Aline Sevenants
607	Unreliable and Anomalous: How the Credibility of Data Affects Belief Revision	Jesse Sparks
625	Selection Strategy of Effort Control: Allocation of Function to Manual Operator or Automation System	Akihiro Maehigashi
627	Experimental investigation of effects of representations and contexts on comprehension and generation of line graphs	Nana Kanzaki
628	Cognitive processes underlying the continuity effect in spatial reasoning	Jelica Nejasmic
629	The Effects of Numeral Classifiers and Taxonomic Categories in Chinese Speakers' Recall of Nouns	Jenn-Yeu Chen
630	A closer look at moral dilemmas: latent structure of morality and the difference between the trolley and footbridge dilemmas	Kuninori Nakamura
636	Conflict-Monitoring Framework Predicts Larger Within-Language ISPC Effects: Evidence from Turkish-English Bilinguals	Nart Bedin Atalay
