Table of Contents

Introduction ......................................................................................................................... 1
Organizing Committee ......................................................................................................... 3
Program Committee ........................................................................................................... 4
Sponsors ............................................................................................................................... 5
Conference Awards ............................................................................................................ 6
Gluskho Dissertation Prizes and NSF Fellowships ............................................................. 8
Invited Plenary Presentations ............................................................................................. 9
Workshops

Women in Cognitive Science sponsored interactive panel discussion: Professional advancement, leadership and international collaboration ................................................................. 10
Laurie Beth Feldman, Janet van Hell, Judith Kroll, Suparna Rajaram

Teleoperated Android as a Tool for Cognitive Studies, Communication and Art ............. 12
Shuichi Nishio, Hiroshi Ishiguro

Modeling the Perception of Intentions ............................................................................... 14
Barbara Tversky, Shimon Ullman, Dare Baldwin, Frank E. Pollick, Joshua Tenenbaum, Tao Gao, Peter Pantelis, David Pautler

Tutorials

And Now for Something Completely Different: Python in Cognitive Science .................. 16
Mark Andrews, Jesse Diaz

Full day tutorial on Quantum models of cognition and decision ....................................... 18
Jerome Busemeyer, Peter Bruza, Taiki Takahashi, Jennifer Trueblood

Using Bayes to Interpret Non-significant Results ................................................................. 20
Zoltan Dienes

Nengo and the Neural Engineering Framework: From Spikes to Cognition ...................... 22
Chris Eliasmith, Terrence Stewart

Probability, programs, and the mind: Building structured Bayesian models of cognition ..... 24
Noah Goodman, Joshua Tenenbaum

Using Machine Learning for Exploratory Data Analysis .................................................. 26
Joshua Lewis, Virginia de Sa

Practical Advice on How to Run Human Behavioral Studies ............................................ 28
Frank Ritter, Jong kim
Symposia

Robotics and Emotion ............................................................... 30
   Rolf Pfeifer, Hiroshi Ishiguro, Yuichiro Anzai, Naomi Miyake

Computational Models of Intuitive Physics .................................. 32
   Peter Battaglia, Tomer Ullman, Joshua Tenenbaum, Adam Sanborn, Kenneth Forbus, Tobias
   Gerstenberg, David Lagnado

The role of comparison in structure learning: Developmental, learning science, and computational
   perspectives ................................................................. 34
   Stella Christie, Dedre Gentner, Mutsumi Imai, Etsuko Haryu, Hiroyuki Okada, Ji Y. Son,
   James Stigler, Leonidas Doumas, Robert G. Morrison, Lindsey E. Richland

Neural Computations Supporting Cognition: Rumelhart Prize Symposium in Honor of Peter Dayan 36
   Kenji Doya, John O'Doherty, Alexandre Pouget, Peter Bossaerts, Nathaniel Daw, Yael Niv

Thirty years of Marr’s Vision: Levels of Analysis in Cognitive Science ......................... 38
   Chris Eliasmith, Tom Griffiths, Valerie Gray Hardcastle, Brad Love, William Bechtel,
   Richard P. Cooper, David Peebles

New Frontiers in Computational Models of Grammatical Development .................... 40
   Micah Goldwater, Scott Friedman, Dedre Gentner, Kenneth Forbus, Cynthia Fisher, Michael
   Connor, Dan Roth, Franklin Chang, Gary Dell

Computational, Cognitive, and Neural Models of Decision-making Biases .................. 42
   Jonathan Malmaud, Joshua Tenenbaum, Peter Dayan, Laurence Maloney, Edward Vul, Nick
   Chater

Governing Board Symposium: Cognitive Science and the Learning Sciences .............. 44
   Naomi Miyake, Roy Pea, Reinhart Pekrun, Kurt Van Lehn, Richard Catrambone, Stella
   Vosniadou

How Vertical Spaces Are Perceived and Represented ................................... 46
   Daniele Nardi, Frank Durgin, Kate Jeffery, Steven Weisberg

What Can Cognitive Science Say or Learn about Economic Crises? ......................... 48
   Magda Osman, Björn Meder, Gerd Gigerenzer, Nick Chater, Daniel Read, Hansjörg Neth

Dynamic decision making: neuronal, computational, and cognitive underpinnings ........ 50
   Magda Osman, Maarten Speekenbrink, Peter Dayan, Masataka Watanabe, Nigel Harvey

Grammatical Approaches to Written and Graphical Communication ....................... 52
   Colin Wilson, Neil Cohn, James Myers, Stephen Goldberg, Ariel Cohen-Goldberg

Papers

Constructing a hypothesis space from the Web for large-scale Bayesian word learning .... 54
   Joshua Abbott, Joseph Austerweil, Tom Griffiths

Predicting focal colors with a rational model of representativeness .......................... 60
   Joshua Abbott, Terry Regier, Tom Griffiths

Gestures in Communication through Line Graphs ....................................... 66
   Cengiz Acarturk, Ozge Alacam
Distributional Learning of Vowel Categories Is Supported by Prosody in Infant-Directed Speech .... 72
Frans Adriaans, Daniel Swingley

Emotion-Based Reinforcement Learning .......................................................... 78
Woo-Young Ahn, Olga Rass, Yong-Wook Shin, Jerome R. Busemeyer, Joshua W. Brown,
Brian F. O’Donnell

Cooperation in risky environments: Decisions from experience in a stochastic social dilemma .... 84
Florian Artinger, Nadine Fleischhut, Vittoria Levati, Jeffrey R. Stevens

Modeling individual differences in socioeconomic game playing .............................. 90
Derrik Asher, Shunan Zhang, Andrew Zaldivar, Michael Lee, Jeffrey Krichmar

Lexical Access Across Languages: A Multinomial Model of Auditory Distraction .......... 96
Philip Beaman

Diagramming Phenomena for Mechanistic Explanation ........................................ 102
William Bechtel, Adele Abrahamson

Route choice in individuals—semantic network navigation ..................................... 108
Nicole Beckage, Mark Steyvers, Carter Butts

Competent Deontic Reasoning: The Abstract Deontic Selection Task Revisited .......... 114
Sieghard Beller, Andrea Bender

That’s what she (could have) said: How alternative utterances affect language use .......... 120
Leon Bergen, Noah Goodman, Roger Levy

Word predictability and frequency effects in a rational model of reading .................. 126
Klinpton Bicknell, Roger Levy

The retriever-connector model: Matching Classroom Data and Agent-Based Computer Models to Simulate Students’ Use of Multiple Epistemological Resources ................................................................. 132
Paulo Blikstein

Inducing Mathematical Concepts from Specific Examples: The Role of Schema-Level Variation ... 138
David Braithwaite, Robert Goldstone

Learning to recognize unfamiliar voices: the role of language familiarity and music experience ... 144
Micah Bregman, Sarah Creel

Misconceptions Regarding Emergent Phenomena Vary By Domain .......................... 150
Sarah Brem, Glenda Stump, Gale Sinatra, Raymond Reichenberg, Benjamin Heddy

Do I know that you know what you know? Modeling testimony in causal inference ........ 156
Daphna Buchsbaum, Sophie Bridgers, Andrew Whalen, Elizabeth Seiver, Tom Griffiths,
Alison Gopnik

Revisiting the Relationship between Allocentric-Heading Recall and Self-Reported Sense of Direction ................................................................. 162
Heather Burte, Mary Hegarty

Space-Time Interdependence and Sensory Modalities: Time Affects Space in the Hand But Not in the Eye ................................................................. 168
Zhenguang Cai, Louise Connell
Sentic Panology: Swapping Affective Common Sense Reasoning Strategies and Foci .......................... 174
  Erik Cambria, Daniel Olsher, Kenneth Kwok

Object discovery and inverse physical reasoning .......................................................... 180
  Christopher Carroll, Charles Kemp

Category structure modulates interleaving and blocking advantage in inductive category acquisition 186
  Paulo Carvalho, Robert Goldstone

Implicit Learning of L2 word stress rules ................................................................. 192
  Ricky Chan, Janny Leung

Generating Realistic Semantic Codes for Use in Neural Network Models .......................... 198
  Ya-Ning Chang, Steve Furber, Stephen Welbourne

Word Form Encoding in Mandarin Chinese Typewritten Word Production .......................... 204
  Jenn-Yeu Chen, Train-Min Chen

What Counts in Mandarin Chinese: A Study of Individuation and Quantification............... 210
  Pierina Cheung, Peggy Li, David Barner

The Role of Preview and Incremental Delivery on Visual Search .................................... 216
  Eric Chiu, Michael Spivey

Determining Relevance: Close Enough is Good Enough ............................................... 222
  Sheldon Chow

Subject Relative Production in SLI Children during Syntactic Priming and Sentence Repetition 228
  Moreno Coco, Maria Garrafa, Holly Branigan

Segmenting Visual Narratives: Evidence for Constituent Structure in Comics .................... 234
  Neil Cohn, Phillip Holcomb, Ray Jackendoff, Gina Kuperberg

Framing attention in American and Japanese comics .................................................... 240
  Neil Cohn, Amaro Taylor-Weiner, Suzanne Grossman

Early-Talker and Late-Talker Toddlers and Networks Show Different Word Learning Biases .......... 246
  Eliana Colunga, Clare Sims

Do you see what I'm singing? Visuospatial movement biases pitch perception .................... 252
  Louise Connell, Zhenguang Cai, Judith Holler

Flexible Shortcuts: Linguistic Distributional Information Affects both Shallow and Deep Conceptual Processing ................................................................. 258
  Louise Connell, Dermot Lynott

Exploring Decision Rules and Sampling Dynamics in Recognition Memory ....................... 264
  Gregory Cox, Richard Shiffrin

Reverse appraisal: The importance of appraisals for the effect of emotion displays on people’s decision making in a social dilemma ................................................................. 270
  Celso de Melo, Jonathan Gratch, Peter Carnevale, Stephen Read

Neural correlates of social perception: The posterior superior temporal sulcus is modulated by action rationality, but not animacy ......................................................... 276
  Ben Deen, Rebecca Saxe
