

Cognitive Sciences Strategies for Futures Studies (Foresight)

Ahmad Mahdeyan

Strategic Management School, Supreme National Defense University, Tehran, Tehran, Iran

Abstract: It seems before understanding the mind structure and laws governing the process of perception, we've gone into the application of science to build better futures. This is because the science begins with attitude not the reality. The major goal of this study is to identify qualitative relationships among key variables across of Cognitive Sciences (CS) with Futures Studies (FS). Ideas and subjects that explained here are just introduction to this research main goal. As a conclusion, by some strategies of CS for FS the Future Oriented Artificial Intelligence Machine as a science fiction idea has been introduced.
